TOWARDS RESOURCE RESILIENT INDIA SECURITY OF NATURAL RESOURCES FOR ALL: THE CRITICAL NEED FOR COHERENCE IN POLICIES AND ACTIONS

2017 Annual Conference
The Bombay Stock Exchange, Mumbai, India

INDIAN
NATIONAL
ASSOCIATION

BALIPARA FOUNDATION

Assam • India

Deutsche Gesellschaft
für Internationale
Zusammenarbeit (GIZ) GmbH

THE KEY ISSUES OF POLICY COHERENCE

Fundamental Issues

Natural resources are enormous blessings of our planet earth that organisms use for their survival. They can be either biotic (forests and wildlife) or abiotic (water, soil, air and minerals). However, these resources are spread unevenly, which creates pressure on nations. Previous patterns of the world's growth have brought increased prosperity, but through intensive and often inefficient use of resources. It is needed to create more with less, delivering greater value with less input and using resources in a sustainable way to minimizing their impact on the environment.

India is blessed with many natural resources, it is the seventh largest country with 3.29 million sq. km of landmass and the second most populous country in the world. Eventually, we don't have equitable access to renewable resources, on the other hand, we have less stock of finite non-renewable resources that keep decreasing with their over and rapid consumptions. Therefore, a roadmap is required to make a resource resilient 'Make in India'. The present conference will focus debates on resource security, resource inclusivity (access), resource use impact and a way forward for resource efficiency.

Targets

1. Materials and Minerals: Optimize use of minerals, preservation and recycling, resource efficient infrastructures, security of critical minerals, tackling challenges of commodity markets and innovations in extraction, etc.
2. Water and Marine resources: One drop more crop, prevent flooding and drought by fighting climate change, ensure clean water, blueprint on water and groundwater directives, etc.
3. Land: Fertile land for agriculture, reduce land take, remediate contaminated sites, suitable infrastructure and effective land use, etc.
4. Soils: Prevent soil damage, mitigate infrastructure impact, restore organic matter contents, avoid chemical pollution, etc.
5. Ecosystems and Biodiversity: Reduce acidification, avoid ecosystem damage and maintaining biodiversity.
6. Waste: Reduce consumption, development of new materials, use of newer cleaner technologies, use of more abundant resources in preference to less abundant ones and recycling, reusing and judicious use of resources with minimum waste. Promote circular economy, a thinking beyond take, make, dispose, and an economy of restorative and regenerative attributes.

The conference will embark on various debates under four themes- Resource Efficiency, Resource Inclusivity, Resource Security and Resource Use Impact.

The Debate Needed Today

The three different dimensions - ecological, economical and ethnological (i.e. social or cultural) are associated with natural resources. If a natural resource is required to be used, its use must be physically possible, economically viable and culturally acceptable.

Impact of the Conference

Indian National Association for the Club of Rome envisions creating a platform for debate and consultations for reduction in consumption of resources, more efficient use of existing resources, equitable access of existing and future resources, price volatility of resources, material recycle and reuse and legal and policy framework analysis.

Indian National Association for the Club of Rome, Annual Conference (16-17 November 2017), will bring together top national and international experts, thought leaders, policymakers. It will look deeply into existing or proposed policies that have counterproductive implications for securing of natural resources. Finally, it will highlight this needed coherence among these policies, and help in the formulation of converging strategies for revising or strengthening them.

The Indian National Association for the Club of Rome (CoR-India) promotes a distinctly Indian paradigm to address the most pressing concerns of India and the world, such as natural resources, forests, land, soils, food, water, energy security, green economy and resource efficiency. The Club of Rome-India is a part of the Club of Rome network.

We would like to solicit your gracious presence in the below mention plenaries.

PLENARIES

Resource Efficiency	Plenary Session1: Materials Security for Efficient Make in India
	Plenary Session 2: Energy Security for All
Resource Inclusivity	Plenary Session 3: Equitable access to India's Natural Resources - Water and Terrestrial Ecosystem for All
Resource Security	Plenary Session 4: Price volatility of Resources- a challenge towards minimize and mitigate the price volatility of essential commodities
Resource Use Impact	Plenary Session 5: Circular Economy and Materials Recycle - business scope towards materials security
